Plant City, Florida 33566

Re: **Letter of Recommendation**
COMANCO Environmental Corporation
Jefferson Parish Landfill - Construction of Cells 20 & 21

Dear Mr. Holmes:

I would like to recognize COMANCO for their excellent work from both the field installation crew and the project manager for the above referenced project. I am serving as the Project Engineer for Progressive Waste Solutions of LA for this project.

This project evolved into a very challenging one with various site condition issues, design changes and numerous weather delays. The Superintendent and his crew worked very hard to overcome installation challenges to complete the work as expeditiously as possible while maintaining the quality installation that we expected. The project manager, David Barnett, worked very hard to accommodate schedule changes and weather delays to get crews lined up when requested.

I would not hesitate to recommend COMANCO for future projects and to other clients. I look forward to working with COMANCO as this project continues as well as on potential future ones.

Sincerely,

SIGMA ENGINEERS AND CONSTRUCTORS, INC.

Dale L. Steib, P.E.
Project Manager
